

**River Road Utility District
2201 River Road
Ashland City, TN 37015**

Well User Agreement

In accordance with River Road Utility District cross connection control program, a private well or auxiliary water source may not be connected in any manner to the public water supply unless proper protection against cross connection is provided. Only Reduced Pressure Backflow Preventers or approved air gaps may be used for protection. These devices must have prior approval by the River Road Utility District. Customers not in compliance with this rule will have their water service discontinued.

This serves as notification that a well will be utilized at the following address:

Please type or print

I (we) understand and agree that this system is, and shall remain totally segregated from the public water system, and no unapproved or unauthorized cross connections, auxiliary intakes, bypasses, or interconnections will be permitted without the written approval of the River Road Utility District.

I (we) further understand and agree that should any auxiliary water system be connected to the public water system at the above address, maximum cross connection control equipment in the form of an approved air gap or reduced pressure backflow prevention device shall be installed to protect the public water supply.
